## Global Landscape for Medical and Wellness Tourism

### Medical Tourism

The medical tourism market is experiencing rapid growth, driven by rising demand for affordable, high-quality care across borders.

This growth is largely attributed to the high cost of healthcare in developed countries, and long wait times for elective procedures, prompting patients to seek affordable treatment abroad. Procedures not covered by insurance such as cosmetic surgery, dental care, and infertility treatments are significant contributors to this trend.

### Wellness Tourism

In parallel, the global wellness tourism market is also witnessing sustained expansion, driven by rising awareness of health and well-being, increasing disposable incomes, and the integration of digital technologies. The market valued at USD 954.14 billion in 2024 and is expected to reach USD 2,054.90 billion by 2034.6. North America currently leads the market, while Asia-Pacific is expected to grow at the fastest pace due to infrastructure development and growing interest in wellness focused travel.
